

# Action Center Plugin

Our VoterVoice Action Center Plugin will enable you to plug the VoterVoice content into any page on your website (what we will call the “parent page”). You will maintain control of your page. You can edit the styles and links or make any other changes you desire to the page that surrounds the VoterVoice content. Most associations create a page on their website called ‘Action Center’ or something similar just for pulling in the VoterVoice content.

When you are ready to deploy the plugin on your website, we will give you two lines of html code that will load our Action Center. Follow these three steps to set this up:

1. Place the plugin code in the `<head>` section of your html, as near the beginning of the document as possible. The plugin code specific to your association should be included in the email you received with this document.\*

If you don't have access to change the `<head>` section, or if the `<head>` section is shared across all pages on your site, then place the plugin code in the body instead. It must be before the `<vv:main></vv:main>` tag in **Step 2**.

2. Insert our placeholder tag `<vv:main></vv:main>` inside the main content area of your page. This will usually be a `<td>`, a `<div>`, or an `<article>`.\*\*
3. Tell us the URL of the parent page where you’ve inserted the plugin. If the parent page changes at any point in the future, you need to let us know so we can update that in our system. This enables us to redirect VoterVoice links to your site. You *must* let us know the URL to that page, or the redirection of VoterVoice links to your site will not work.

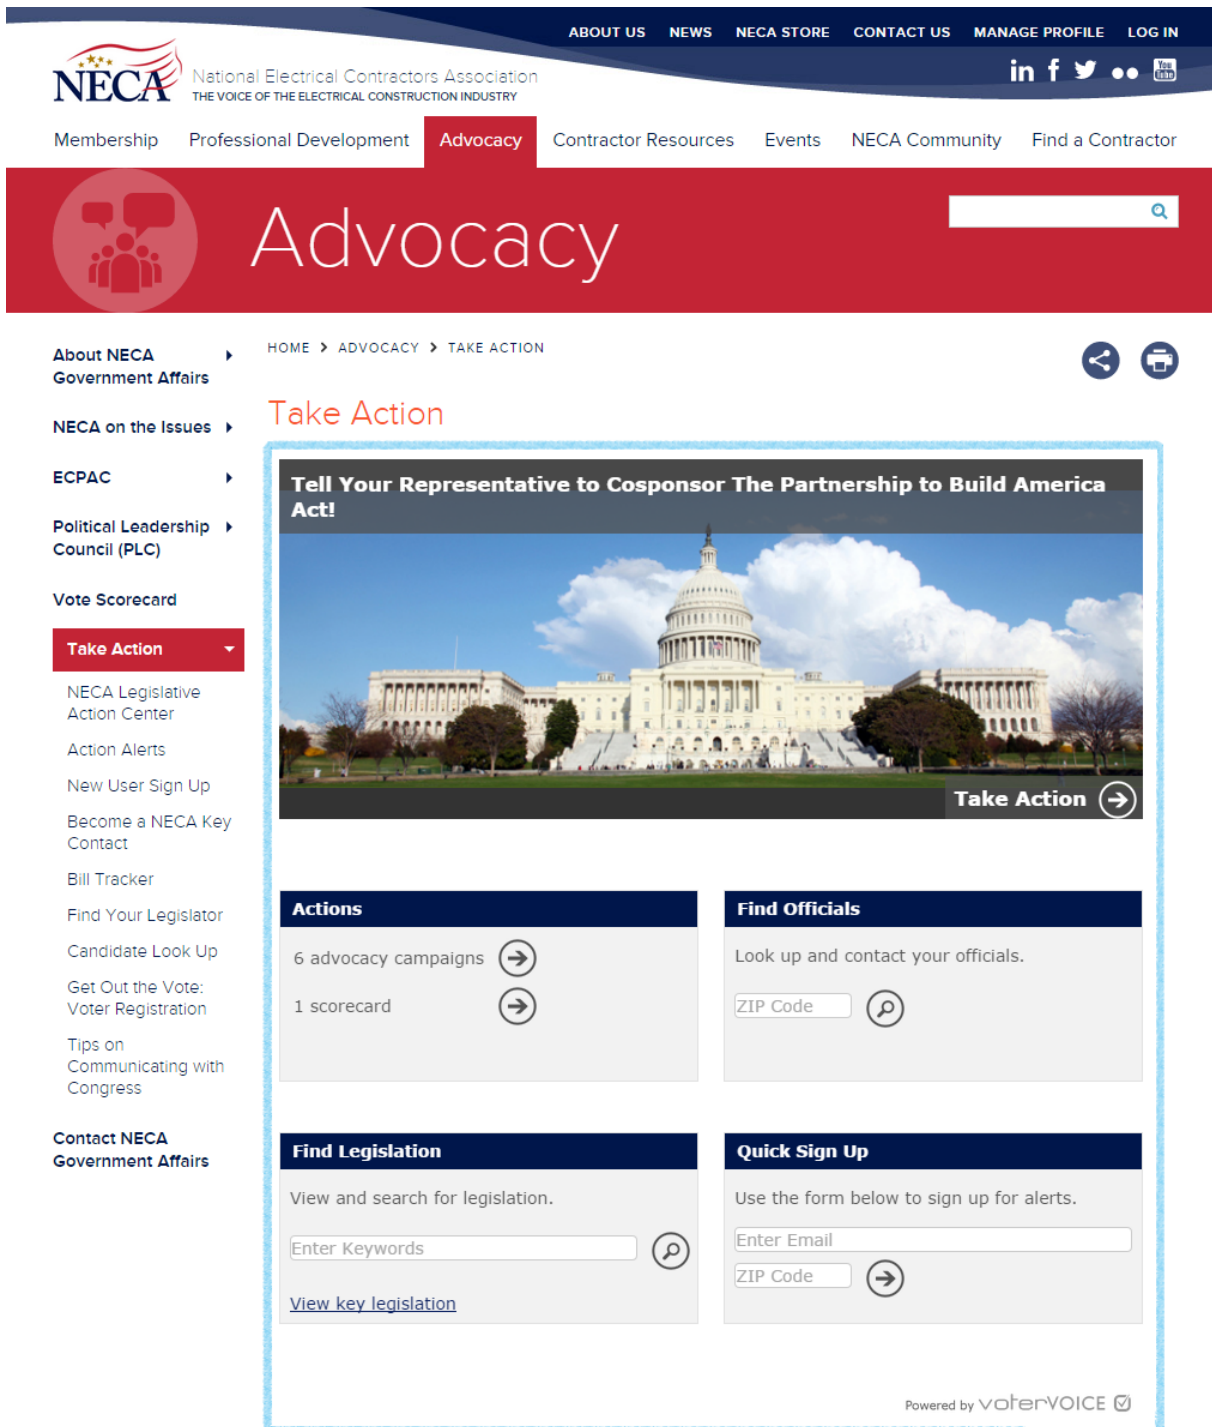

---

\* By default, the plugin will show our /Home page, which displays your active campaigns, lets your members look-up their officials, and more, depending on your package. However, we can modify it to default to a listing of campaigns, a specific campaign, or one of our other tools (e.g.: Survey, Scorecard, etc.). Please call or email support to discuss any modifications you need.

\*\* Ensure that the area where the plugin will be displayed is *at least* 405 pixels wide (about one-third of a typical page’s width).

## ...And You're Done!

The end result of implementing the plugin will look something like this on your site. The light blue line indicates VoterVoice Action Center Plugin content.

The screenshot shows the NECA (National Electrical Contractors Association) website. The top navigation bar includes links for ABOUT US, NEWS, NECA STORE, CONTACT US, MANAGE PROFILE, and LOG IN. Below this is a secondary navigation bar with links for Membership, Professional Development, Advocacy (highlighted), Contractor Resources, Events, NECA Community, and Find a Contractor. The main header features the NECA logo and the text "National Electrical Contractors Association THE VOICE OF THE ELECTRICAL CONSTRUCTION INDUSTRY". A large red banner with the word "Advocacy" and a search bar is positioned below the header. The left sidebar contains a list of links: About NECA Government Affairs, NECA on the Issues, ECPAC, Political Leadership Council (PLC), Vote Scorecard, Take Action (highlighted), NECA Legislative Action Center, Action Alerts, New User Sign Up, Become a NECA Key Contact, Bill Tracker, Find Your Legislator, Candidate Look Up, Get Out the Vote: Voter Registration, Tips on Communicating with Congress, and Contact NECA Government Affairs. The main content area is titled "Take Action" and features a large image of the U.S. Capitol building with the text "Tell Your Representative to Cosponsor The Partnership to Build America Act!". Below this image is a "Take Action" button. The page is divided into four sections: Actions (6 advocacy campaigns, 1 scorecard), Find Officials (Look up and contact your officials, ZIP Code input), Find Legislation (View and search for legislation, Enter Keywords input, View key legislation link), and Quick Sign Up (Use the form below to sign up for alerts, Enter Email input, ZIP Code input). The footer of the plugin content area states "Powered by voterVOICE".
